SUMMARY

An undergraduate student of Telkom University Bandung who has a high interest in technological advancement. Has good leadership skills with a wealth of experience. An analytical thinker with excellent problem solving skills and ability to work well independently and collaboratively. Bringing enthusiasm and a willingness to learn to any role.

EXPERIENCE

Programming Teaching Asisstant (Go) **September 2026 - Present**

Led weekly hands-on Go labs for 15+ students perclass, from fundamentals to advanced topics. Debugged and reviewed student code, giving 1-on-1 feedback on correctness, readability, and code structure. Graded assignments and exams across 2 semesters, mentoring 30+ students in total.

Data Structure Teaching Assistant (C++) **September 2026 - Present**

Led weekly hands-on C++ labs on data structures (linked lists, stacks, queues, trees, graphs). Debugged and reviewed student code, giving 1-on-1 feedback on correctness, readability, and code structure. Graded assignments and exams across 2 semesters, mentoring 30+ students in total.

Academic Tutor - KONTENT HIMA IF Telkom University **June 2026 - Present**

Responsible for mentoring undergraduate Informatics students in core subjects, specifically Algorithm and Programming II, Algorithm Complexity Analysis, and Data Structures. Key tasks include breaking down complex concepts, designing practical programming exercises, and conducting exam preparation sessions to enhance students' logical thinking and debugging skills.

Mentor: helPhin Telkom University | Bandung Techno Park **Feb 2026 - Present**

Delivered structured peer tutoring and academic guidance, prepared learning materials and practice exercises, and supported students' academic achievement through collaborative learning approaches.

Student Intern - PT Mekar Armada Investama (New Armada Group) **July 2026 - September 2026**

Part of the Corporate IT department, responsible for assisting in daily IT operations, maintaining hardware and software infrastructure, and providing technical support for corporate needs. Tasks include troubleshooting technical challenges, supporting network/system administration, and ensuring operational continuity across the company's internal IT systems.

Lecture Assistant: Algorithm and Programming II **Jan 2026 - June 2026**

Designed and delivered structured preliminary assignments to strengthen students' understanding of core Go programming concepts, developed automated coding challenges through the LMS Code Runner platform, and provided technical guidance to enhance students' problem-solving abilities, logical thinking, and proficiency in Go programming.

PROJECT

ReuseID (Secondhand Donation Platform) ; *Back-End Engineer & Quality Assurance*

- Developed and maintained a type-safe back-end architecture using TypeScript in Node.js, ensuring scalability and maintainability.
- Managed database migration from MySQL (development) to PostgreSQL (production).
- Automated deployment and infrastructure configuration via Vercel, optimizing API performance and availability.
- Designed and executed QA test scenarios to validate data integrity and system stability before release.
- Collaborated with UI/UX teams on Figma to align database structures and API endpoints with interface needs.
- Leveraged AI-powered tools to accelerate coding, debugging, and test case generation.

KKN 116 Tamangapa – Universitas Hasanuddin ; *Web Developer*

- Developed a digital information platform for the 116th Thematic Community Service Program (KKN) of Hasanuddin University, focusing on sustainable waste management and environmental awareness.
- Designed and structured website sections covering regional profiles, team members, program activities, educational initiatives, and community development.
- Implemented content sections to showcase environmental programs, including Eco-enzyme production, Ecobrick recycling, and Black Soldier Fly (BSF) maggot cultivation.
- Organized informational content and activity updates to improve accessibility and communication between the KKN team and the local community.
- Built a centralized digital platform to document community engagement activities and promote sustainable environmental practices in Tamangapa.

Internal Lunch Attendance & Billing System ; *Web Application Developer*

- Developed an internal lunch attendance web application integrated with a database and QR codes embedded in employee ID cards to streamline employee meal tracking.
- Implemented authentication and role-based access control, restricting user registration to administrators.
- Built an administrative dashboard to provide summary insights into lunch attendance and operational records.
- Developed weekly billing reports and invoice generation features to calculate total meal expenses payable by the company to its catering vendor.
- Built the application using PHP, Laravel Blade, Tailwind CSS, and Vite.

Valas Company Profile CMS ; *Full-Stack Developer*

- Developed a prototype company profile website for Valas using Next.js and TypeScript.
- Implemented a content management system (CMS) for managing news articles, exchange rates, testimonials, and other website content.
- Implemented JWT-based authentication and bcrypt password hashing to support secure authentication and credential storage.
- Developed administrative features for creating, updating, and managing website content through a centralized interface.

EDUCATION

Telkom University, Makassar **Present**
S1 Informatics (IPK 3.85)

SMA Negeri 2 Makassar **2020 - 2023**
Mathematics and Natural Sciences

SKILLS & CERTIFICATE

- **Technical Skills:** Microsoft Office (Word, Excel and Presentations), Programming Language (Python, GO, Java OOP, C++, Javascript, Typescript) and SQL (MySQL, PostgreSQL).
- **Expertise:** Critical thinking, problem solving, planning and prioritizing, and time management.
- **Languages:** Indonesian, English.
- **Certificate:**
  - Certificate English Proficiency Test (EPrT): 475
  - Certificate English Communicative Competence Test (ECCT): 3.75
